BEFORE YOU BEGIN BROWSING...

This publication contains information based on quarterly employment and earnings reports filed by employers who have workers in North Dakota. Employers report the number of employees they have on their payroll for each month in the quarter and their total quarterly payroll. By summarizing this information by industry and location, trends can be established that provide a wealth of information on local economies. Below is a guide and sample of the format found in the booklet.

SAMPLE LAYOUT

Average Weekly Wage is calculated by dividing the Average Annual Wage by 52 (the standard number of weeks in a year). Average Annual Wage is calculated by dividing Total Annual Wages by the Average Annual Employment

Average Annual Employment is total employment divided by 12 months

Total annual wages for the calendar year

As you use this report, keep in mind that the data are limited to those workers who are covered by either state or federal unemployment insurance laws. North Dakota law requires that all workers in the private sector be provided with this coverage by the employer if the employer:

- Employs one or more workers 20 weeks or more in a calendar year; or
- Pays \$1,500 or more in payroll in any calendar quarter.

State law also requires that all state and local government workers be provided with this coverage.

In addition, agricultural workers are covered if the employer:

- Employs 10 or more workers for 20 weeks or more in a calendar year; or
- Pays \$20,000 or more in quarterly payroll.

Households with domestic help must provide coverage for their workers if the employer has a payroll that reaches or exceeds \$1,000 per quarter. The majority of the domestic help employed in North Dakota involves the care of the employer or other family members, either the aged or children, in the home.

There are a few select groups that are exempt from this coverage. They include:

- Self-employed (farm and nonfarm sectors);
- Individuals working for religious organizations;
- Students working for the college they attend; and
- Individuals employed in church-related elementary and secondary schools.

Employers submitting quarterly tax returns must report all full-time and part-time employees on their payrolls, including those on commission. Gross earnings are influenced by these variables and the results obtained when calculating an average weekly wage will be affected. This is especially noticeable in the retail trade industry where the average weekly wage is comparatively low, due in large part to the large number of part-time workers.

As in most statistical reports, subentries may not add to totals due to rounding.

An employer can be represented more than once in a geographic area, depending on the number of business establishments, or worksites, the employer has in a specified area. For example, an employer with an establishment in all 53 North Dakota counties is counted 53 times in this report. Occasionally, the county designation of an establishment cannot be determined and is, therefore, termed “unclassified.” These establishments are the reason the region and county totals do not add up to the statewide total, as the statewide data include every establishment in the state. In 2008, the number of “unclassified” establishments totaled 362, or 1.3 percent of the statewide total. As a whole, these establishments accounted for 1,039 employees and \$55.9 million in total wages. Again, these establishments do not have a county designation, but are industry coded. Therefore, they are included in the statewide detail, but not the regional or county detail.

All industry data are based on the North American Industry Classification System (NAICS). NAICS classifies all economic activities into 21 sectors. The NAICS sector, their two-digit codes and the distinguishing activities of each are:
